

PMSA TO HOLD TRAINING WORKSHOPS

Quintin Booyesen.

Pan Mixers South Africa (PMSA) - the largest supplier of concrete brick, block and paving-making machinery and technology in Africa - is providing greater value-added support to its client base through training workshops at its showroom and sales facility in Jet Park, Boksburg.

"The decision to host regular open training and workshops is of particular importance to PMSA, especially as our product and service offering to the southern African construction, mining and precast concrete sectors continues to expand," says PMSA marketing and sales manager, Quintin Booyesen.

He notes that the workshops will be conducted monthly - 12 are planned for 2014 - and that up to 17 industry professionals per session will be invited.

"The seminars will be either half or one-day events and will be presented by a variety of PMSA's European suppliers. They

will showcase our products and services and explain technological developments."

In addition PMSA will also be conducting in-house training sessions for its staff to ensure that they are kept up-to-date and skilled in the company's product offering.

"A moisture measuring and metering technology workshop, which was hosted by Ludwig Moisture Control in January, was attended by the concrete ready-mix and the concrete precast sectors. An ABECE workshop for concrete roof tile solutions, took place in February 2014," he added.

Other seminars have been planned for 2014 and are advertised on the PMSA website, www.pmsa.com. Interested parties can contact vannesa@panmixers.co.za.

Booyesen adds that PMSA is planning to host more in-depth, two-day courses for equipment owners and prospective clients.
