

Concrete floor grinding machine

Pan Mixers South Africa (PMSA) has obtained exclusive distribution rights to complete range of world-class concrete floor grinding machinery through its newly-established company, Galileo Trading.

Galileo national sales manager, Andreas Hasselmos pointed out that a total of 11 different HTC grinding machines are available locally through Galileo, which include:

- HTC 400 DS/VS: ideally-suited for quick and effective removal of high spots
- HTC 420 VS: a small, durable machine with a large capacity, capable of handling everything from floor preparation and grinding, to removal tough coatings like adhesive, screed and paint
- HTC 500: a manually-operated grinder powered by a 4 kW motor, with a grinding pressure of up to 130 kg, the HTC 500 can be used for coarse grinding, preparation grinding and maintenance
